Edwards ULTRAGRADE™ Performance Oil

Edwards, ULTRAGRADE™ Performance 19, oil is produced by a unique hydrotreating process. This process eliminates nitrogen, sulphur and oxygen and the aromatic hydrocarbons, leaving a clear base stock essentially free of impurities.

When combined with additives, the ULTRAGRADE™ Performance oils give improved vacuum performance, thermal and oxidation stability and rust inhibition. The anti-oxidants included in the oils enable the pump to withstand high operating temperatures without oil degradation, so extending intervals between oil changes.

The properties of the oils allow them to be used in a wide range of applications. New ULTRAGRADE™ Performance oils are the best choice for large pumps used in heavy-duty, cycling applications.

SPECIFICATIONS:

Pour Point: -15 Degrees Celsius

Flash Point: 225C Degrees Celsius

Lubricant Chemical Group: Mineral Oil

Performance Data:

Viscosity @50C: 48.60 N*s/m²
